Old and Feeble Dog Basic Tips

Old and feeble dogs are commonly in need of more help; we understand that helping them is a journey. Many of us have had old dogs before and likely already know some basic tips to helping old and feeble dogs, but here is our list of what possibly can be done to keep them healthier during their life.

Mobility:

- Trim nails once every 2 months.
- Help them avoid slippery floors, get carpet runners to make it easier for them to walk.
- If your dog has weak back legs or vice versa, always think about a mobility device!
- If your dog is too old for stairs, get a body sling to carry them up and down.
- Many dogs like walks even if they cannot walk that far anymore. Look into what small cart options are available for them to sit and ride in!

Diet:

- Always think about prescription diets that promote mobility, ask a vet.
- Home cooking your own food is also an option, ask about our recipes!
- Forms of Omega-3 fatty acids, for example Vetoquinol Omega.
- Ask your vet about a prescription for arthritis pain relief.
- Ask your vet about medical procedures to ease pain.
